The mission of Washington University School of Medicine is to lead in advancing human health through the best clinical care, innovative research and the education of tomorrow’s leaders in biomedicine in a culture that supports diversity, inclusion, critical thinking and creativity.

Our outstanding faculty are international leaders in patient care, research and education who have contributed major discoveries and innovations to the fields of science and clinical medicine. Our students learn from master clinicians and researchers while pursuing their studies in a wide array of academic departments and programs. Our MD program, as well as our programs in occupational therapy, audiology and communication sciences, and physical therapy, are among the highest ranked in the country by U.S. News & World Report.

The Division of Biological and Biomedical Sciences

The Division of Biology and Biomedical Sciences (DBBHS) is a graduate education consortium of the Schools of Medicine and Engineering and the College of Arts & Sciences. DBBHS is among the oldest and largest programs of its kind, and its interdisciplinary, individualized approach serves as a national model.

Building the Future

Each year, MD, OT, PT and PACS alumni engage in providing philanthropic and volunteer support for their primary degree granting programs.

Scholarships and Professorships
Friends and alumni of the School of Medicine provide gifts through the William Greenleaf Elst Society to support the academic and research priorities of the school.

Washington University Medical Center Alumni Association (WUMCAA)
The association sponsors various programs for MD alumni, former house staff and current medical students.

Distinguished Alumni Scholarship Program
This program provides full scholarships to four incoming medical students each year.

Students apply their talents in the community to:

- run free weekly clinics for the medically underserved
- gain experience in public health, community medicine and nonprofit work during orientation
- introduce disadvantaged high school students to science careers through the Young Scientist Program
- teach HIV and AIDS prevention in area public schools

Medical firsts include:

- Served as a major contributor to the Human Genome Project; providing the foundation for personalized medicine
- Developed screening tests used worldwide to diagnose Alzheimer’s disease
- Counted the first positron emission tomography (PET) scanner; used to image the brain and other organs at work
- Helped pioneer the use of insulin to treat diabetes
- Developed the first surgical prevention of cancer based on genetic testing — in work on medullary thyroid cancer
- Published the first evidence linking smoking and lung cancer

Ongoing clinical research includes:

- Participating in a national network to determine new ways to prevent preterm birth
- Developing new ways to diagnose and treat stroke as part of a national network of leading stroke treatment centers
- Making groundbreaking contributions to decoding the genetics of cancer and developing personalized treatments
- Leading an international collaboration to study inherited Alzheimer’s disease and spearheading the first drug prevention trial
- Pioneering new methods to prevent heart arrhythmias

Ongoing basic research includes:

- Spearheading research to understand and prevent the devastating consequences of Zika virus infection
- Leading an international effort to map major brain circuits to understand how the mind works and the roots of brain disease
- Pioneering studies probing the links between obesity and malnutrition and the community of microbes living in the gut
- Identifying biomarkers in the brain and spinal cord to diagnose Alzheimer’s disease before symptoms develop

Schoolwide Initiatives
Faculty, students and staff collaborate on major efforts to:

- provide public education opportunities and services to promote health literacy and prevention
- uncover and address health disparities throughout the region through research projects
- study and influence health policy
- identify and address local health priorities through community engagement
- support community development

Student-Run Initiatives
Students apply their talents in the community to:

- run free weekly clinics for the medically underserved
- gain experience in public health, community medicine and nonprofit work during orientation
- introduce disadvantaged high school students to science careers through the Young Scientist Program
- teach HIV and AIDS prevention in area public schools
